## **Summit Celebrates 10 Years In Business**

*Summit Systems Kicks off New Fiscal Year with 10 Year Celebration*

**ATLANTA — February 1, 2008** — Today Summit Systems, Inc. (SSi) of Buford, Georgia celebrates their tenth year in business. The company was originally incorporated January 28, 1998 in Buford Georgia as an integrator of communications based technology by Michael A. Kinsey, majority stock holder and President of Summit Systems.

Michael Kinsey, President stated “Anyone who has started, grew, and managed a private company in a competitive market will understand me best when I say without the professional dedication of our associates and their diligent efforts on a daily basis, we would be telling a different story other than one of Summit’s 10 successful years. Our business partners and customers have the choice, but choose to invest in us daily. It is our employees that insure those investments yield a return on the customer’s technology investments that they trust with Summit, consistently. Over the next decade, Summit Systems will not be resting on our success. Rather, Summit will challenge itself by raising internal benchmark performance standards across the board, develop new quality standards that exceed industry standards, and dedicate ourselves at even higher levels to the success of our associates and customers. This is what makes a good company great.”

Summit Systems, Inc. (SSi) is a privately held, Georgia based professional solutions provider with an impeccable reputation for quality and consistently providing a positive customer experience. SSi provides a unique combined offering with complete service solutions in Audio Visual Systems, Structured Data and Voice Communications, and Power Systems.
