Summit Systems Forms Audio Visual Systems Group

Strategic Focus Developed to Extend Offerings

ATLANTA — June 1, 2007 — Today Summit Systems, Inc. (SSi) of Buford, Georgia announces the addition of the Audio Visual Systems Group. The addition of the Audio Visual Systems Group comes as a first in a series of strategic additions made to focus and enhance services currently offered to existing and new customers. The Audio Visual Systems Group will operate out of the Buford headquarters with dedicated Audio Visual personnel and resources placed throughout Summit's service region.

Tim Gorisek, Sr. Vice President stated "We are very excited about getting this new division under way. Since our inception 9 years ago, Summit has always provided video and audio solutions within a very narrow technology niche. Today with Summit Systems seasoned design and consultation professionals, current field service backbone, and project management staff, we have a strong opportunity to develop this division to focus, widen the spectrum of our offerings, and easily fill an obvious gap in the marketplace. There are many companies, big and small, that claim to be good providers of professional audio visual solutions. Just as Summit has become with their other divisions, our primary goal with the Audio Visual Systems Group is not "*be the biggest*", but to join the short list of quality companies in our competition portfolio, and be regarded by our customers as one of the best in the industry."

Summit Systems, Inc. (SSi) is a privately held, Georgia based professional solutions provider with an impeccable reputation for quality and consistently providing a positive customer experience. SSi provides a unique combined offering with complete service solutions in Audio Visual Systems, Structured Data and Voice Communications, and Power Systems.
