

## Summit Systems Announces Key Manufacturer Partners

### *Key Manufacturer Partners Selected for Audio Visual Systems Group*

ATLANTA — July 1, 2007 — Today Summit Systems, Inc. (SSi) of Buford, Georgia announces the addition of the key manufacturer partners that have been selected by SSi to play a major role in the solution offerings to customers. While they source through direct agreements from many good quality manufacturers, SSi announces what they call their focus lineup. For core technology: NEC Display Solutions, Draper, Crestron, AMX, Extron, Tandberg, Polycom and Polyvision. The infrastructure partners are: Liberty, Chief, and Middle Atlantic.

Tim Gorisek, Sr. Vice President stated “We are very fortunate to work with these manufacturers and the professionals that represent them. Our market strategy is not one that has us sell ourselves as everything to everyone. While keeping our product base open enough to offer options, our strategy and our responsibility to our customers is to keep our line card narrow. We will stay focused, be experts in those products, have true commitment to and from our partners, with the ultimate goal of providing high quality, best of breed solutions and deliver a *Great Customer Experience*, every time. This cannot be accomplished with a large number of random manufacturers in the portfolio. Short of this, we would be just another large box seller that thinks they are an integrator“.

Summit Systems, Inc. (SSi) is a privately held, Georgia based professional solutions provider with an impeccable reputation for quality and consistently providing a positive customer experience. SSi provides a unique combined offering with complete service solutions in Audio Visual Systems, Structured Data and Voice Communications, and Power Systems.
