Summit Announces Large Data Center Project

Summit Systems contracted to provide infrastructure at John's Creek Data Center

ATLANTA — July, 2007 — Today Summit Systems, Inc. (SSi) of Buford, Georgia announces their role in deploying the fiber optic infrastructure for Checkfree's new data center facility at John's Creek, Suwanee Georgia. This large, fully redundant, fiber optic network-cabling infrastructure provides the foundation for CheckFree's enterprise network. For the connectivity, Summit chose the Ortronics Momentum 2 Cassette solution, which CheckFree will recognize the benefit of an extremely high performance system with the flexibility of future fiber connector changes.

Michael Kinsey, President stated "This has been a very exciting project to work on with Checkfree. Because of Summit's culture and customer focus, we perform best under mission critical objectives and this project certainly fits the bill. Working with a great customer like Checkfree combined with the capabilities and technology from a great manufacturer partner like Ortronics will be major assets in making this project successful for all of us."

CheckFree (NASDAQ: CKFR) is a provider of financial electronic commerce services and products. From powering electronic billing and payment, to automating financial transactions, to streamlining regulatory reporting tasks, CheckFree's broad range of solutions continue to set new standards for quality.

Summit Systems, Inc. (SSi) is a privately held, Georgia based professional solutions provider with an impeccable reputation for quality and consistently providing a positive customer experience. SSi provides a unique combined offering with complete service solutions in Audio Visual Systems, Structured Data and Voice Communications, and Power Systems.
